

## EMI-TS Radiated/Conducted EMI Test Systems

### Integrated System Design

A TDK RF Solutions EMI Test System integrates test instrumentation, system controls, positioning devices, and software to test specific products or subsystems for electromagnetic emissions according to international, R&D, and manufacturer-specific standards. TDK EMI Test Systems are designed to perform automated, semi-automated, and manual emissions measurements in an anechoic chamber, shielded room, OATS, or test cell.

### We Meet Your Standards™

TDK designs each system specifically to a customer's product testing requirements, so you receive the exact system solution you need, without unnecessary components and costs associated with off-the-shelf, "one size fits all" test systems. Whether you need to cover basic, generic, product family, and/or product specific standards, the basis of our system design is the standards that are applicable to your products. We combine these requirements with our proven skills in system design, installation, and our extensive experience with dozens of test instrument suppliers. The result is a complete system solution that is ready for use from day one.

### Proven Solutions

Our test system developments are based on proven solutions already in place in Europe, North America, and Asia. Instead of an off-the-shelf approach to design, each new system incorporates the latest technologies to explicitly cover the standards that apply to your products. This gives you accurate, repeatable measurements and minimizes demands on your limited resources.

### Your Vision, Our Mission

Our design goals are the same as your testing goals – simplify test procedures, generate accurate results, maximize productivity of limited personnel resources, and accelerate time to market. No matter what your needs are, we can turn your vision into reality with a turnkey system optimized with the best selection of instrumentation, quality workmanship, and a comprehensive warranty.

**A TDK RF Solutions Radiated Emissions Test System integrates best-in-class test instrumentation, antennas, and software to provide automated testing for electromagnetic emissions according to U.S. and international test specifications.**

**The Conducted Emissions Test System can share instrumentation with the Radiated Emissions Test System to measure conducted electromagnetic disturbances.**

### Turnkey Test System

A turnkey EMI Test System from TDK RF Solutions is designed to be a complete solution to satisfy product testing requirements. A typical system includes:

**EMI test instrumentation** selected to cover applicable frequencies and meet your price/performance requirements.

**Antennas/LISNs/Clamps** selected to match both test standards and test facility capabilities.

**Measurement Accessories** such as switching and positioning devices that simplify control and increase efficiency.

# EMI-TS Radiated/Conducted EMI Test Systems

## Turnkey Test System (continued)

**An EMI Main Control Console** with instruments and system controls strategically placed to provide test engineers easy access to all functions, and a comfortable, ergonomically-correct work environment.

**A System Controller with Application Software** that offers state-of-the-art power to perform emissions tests from pre-scan to final measurements and to control multiple EMI analyzers and receivers.

## EMI Test System Applications

- Commercial and industrial products
- Automotive whole vehicle, automotive components
- Telecommunications, mobile radio, basestation, network equipment
- MIL-STD, Aerospace
- Special categories

## EMI Test System Features

- Best-in-Class Test Instruments
- Fully Integrated Hardware and Software
- Remote Control of Switches, Positioning Devices, and LISNs
- Automated, Semi-automated, and Manual Testing
- Ergonomically Designed Test Consoles and Racks
- High Quality System Cabling and Connectors
- Quality Workmanship
- On-Site Training
- Comprehensive Warranty

## Ordering Information

**Each EMI Test System is designed to your specific needs. Please contact our technical sales team with your requirements:**
